PROFESSIONAL SUMMARY

Mobile-focused Frontend Lead and Full-Stack Engineer with 5+ years of experience building fintech, mobility, and enterprise products. Strong in React Native, Expo, React, Next.js, TypeScript, Firebase, and API-backed mobile workflows. Experienced with payment products, ride-hailing flows, real-time location experiences, performance optimization, and cross-team delivery. Available for relocation for local or international roles.

CORE SKILLS

- Mobile: React Native, Expo, Firebase Auth, Firestore, navigation, cross-platform UI patterns, app performance
- Frontend: React, Next.js, TypeScript, reusable components, design systems, responsive UI
- State and Forms: Redux Toolkit, Context API, React Hook Form, Zod, state synchronization
- Backend Collaboration: Node.js, Express, NestJS, REST APIs, JWT auth, MongoDB, PostgreSQL
- Delivery: Docker, GitHub, Sentry, ESLint, production debugging, performance optimization

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer / Frontend Lead | iRecharge Tech Innovations LTD | Jan 2024 - Present

- Lead frontend delivery for fintech products, including merchant and consumer payment experiences across web and mobile-adjacent flows.
- Contributed to Blink Merchant, a business payment platform supporting tap-to-pay, geo-payment, and scan-to-pay flows.
- Contributed to Blink Pay, a virtual card application focused on secure personal transactions.
- Improved platform performance, UI consistency, and communication between product, backend, and frontend teams.

Frontend / Full-Stack Engineer | Orion Industrial Tech | Nov 2022 - Dec 2023

- Developed and shipped cross-platform mobile features with React Native for iOS and Android.
- Contributed to Dryve User App, a ride-hailing platform with real-time location and user interaction flows.
- Reduced unnecessary re-renders and improved mobile load behavior through component and state optimization.
- Integrated backend APIs and collaborated on mobile-friendly contracts for reliable data handling.

Frontend / Full-Stack Engineer | Spacepen Technology | Apr 2022

- Built responsive product interfaces and backend integrations for payroll automation workflows.
- Implemented dynamic UI flows for employee management and transaction tracking.
- Collaborated on frontend-backend integration to support stable internal business tools.

Frontend Developer | FICLC | Feb 2020

- Developed React and Next.js interfaces for payroll automation and internal operations.
- Implemented reusable UI flows and integrated backend services for business users.

SELECTED PROJECTS

Blink Merchant | Digital payment platform for businesses - Play Store: play.google.com/store/apps/details?id=com.blinkbusiness

- Business payment product supporting tap-to-pay, geo-payment, and scan-to-pay transaction flows.
- Relevant areas: secure payment UX, merchant workflows, mobile fintech interaction patterns.

Blink Pay | Virtual card application - Play Store: play.google.com/store/apps/details?id=com.blinkpay

- Consumer payment app for secure personal transactions and virtual card usage.
- Relevant areas: transaction confidence, account flows, mobile financial UI states.

Dryve User App | Ride-hailing platform - Play Store: play.google.com/store/apps/details?id=com.dryveuser

- Ride-hailing user app with real-time location, trip flow, and user interaction features.
- Relevant areas: location-driven UX, state synchronization, mobile interaction reliability.

Sanitrack | React, React Native, TypeScript, Express.js, MongoDB, Docker

- Designed and implemented web and mobile features with consistent cross-platform interfaces.
- Built backend services and structured API response handling to prevent frontend data inconsistencies.

EDUCATION, CERTIFICATIONS AND LANGUAGES

- Bachelor of Statistics - University of Ilorin, 2021
- React & TypeScript - Udemy, 2022
- React Native - Udemy, 2022
- English; Yoruba
